Print length : 222 pages

(A) Azure Arc (B) Windows Admin Center (C) System Center Configuration Manager (D) All of the above

2. What is the purpose of Azure Arc?

(A) To manage on-premises resources from the cloud (B) To connect cloud resources to on-premises resources (C) To provide a single pane of glass for managing hybrid infrastructure (D) To automate the deployment and management of hybrid infrastructure

3. Which of the following security measures should be implemented in a hybrid infrastructure?

(A) Network segmentation (B) Multi-factor authentication (C) Encryption (D) All of the above

4. What is the role of the Azure Security Center in a hybrid infrastructure?

(A) To provide centralized visibility and security management (B) To detect and respond to security threats (C) To enforce security policies (D) All of the above

5. Which of the following tools can be used to monitor and troubleshoot hybrid infrastructure?

(A) Windows Event Viewer (B) Azure Monitor (C) System Center Operations Manager (D) All of the above

6. What are the benefits of using hybrid infrastructure?

(A) Increased flexibility (B) Reduced costs (C) Improved security (D) All of the above

7. What are the challenges of managing hybrid infrastructure?

(A) Complexity (B) Security (C) Cost (D) All of the above

8. What is the best practice for managing updates in a hybrid infrastructure?

(A) Apply updates as soon as possible (B) Test updates before applying them (C) Schedule updates during off-hours (D) All of the above

9. What is the role of disaster recovery in a hybrid infrastructure?

(A) To protect data and applications from disasters (B) To ensure business continuity (C) To minimize downtime (D) All of the above

10. Which of the following technologies can be used for disaster recovery in a hybrid infrastructure?

(A) Azure Site Recovery (B) Windows Server Failover Clustering (C) Hyper-V Replica (D) All of the above

Answer Key

1. D
2. A
3. D
4. D
5. D
6. D
7. D
8. D
9. D
10. D

This practice test is a valuable tool for assessing your knowledge and skills in administering Windows Server Hybrid Core Infrastructure. By taking this test, you can identify areas where you may need additional study and improve your chances of success on the actual exam.

Remember to review the official exam objectives and study resources to ensure that you are well-prepared for the exam. With the right preparation, you can confidently demonstrate your expertise in this area and advance your career in IT.
