The Problem

Shania Pet Sitting Service Maths Club is a club for students who are interested in math. The club meets once a week to work on math problems and projects. The club is open to all students, regardless of their math ability.

However, the club has been struggling to get members. In the past year, the club has only had an average of 5 members. This is a problem because

the club needs at least 10 members to be able to function properly.

The Reasons

There are several reasons why Shania Pet Sitting Service Maths Club is not getting enough members. One reason is that the club does not have a strong marketing campaign. The club does not have a website or social media presence, and it does not advertise in the school newspaper.

Another reason why the club is not getting enough members is that the club does not offer anything unique. There are several other math clubs in the school, and Shania Pet Sitting Service Maths Club does not offer anything that the other clubs do not.

Finally, the club does not have a strong leader. The club president is not very active, and he does not do a good job of promoting the club.

The Solutions

There are several things that Shania Pet Sitting Service Maths Club can do to increase its membership. One thing that the club can do is to create a website and social media presence. The club can use these platforms to promote its activities and to recruit new members.

Another thing that the club can do is to offer something unique. The club can offer special activities or projects that are not offered by the other math clubs in the school.

Finally, the club can elect a new president who is more active and who is willing to promote the club.

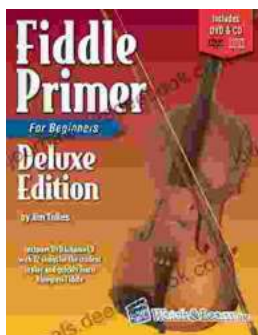

Shania Pet Sitting Service Maths Club is a great club that has a lot to offer students. However, the club is not getting enough members. There are several reasons for this, but there are also several things that the club can do to increase its membership.
